

# Mission Beach Safe Boating Infrastructure

This regular update aims to keep you informed about the progress of the Mission Beach Safe Boating Infrastructure project.

## THANK YOU FOR HAVING YOUR SAY

We would like to thank all of you who have contributed and had your say about the proposed safe boating infrastructure upgrades in Boat Bay. The stakeholder meetings and the discussions at the display were most helpful in informing the next stage of the project. We would particularly like to thank those who provided us with detailed local knowledge to complement the technical studies we have undertaken. In addition to these discussions over 200 surveys have been received to date. The comments indicate there is a diversity of opinion within the community on a preferred solution.

## COMMUNITY ENGAGEMENT TO CONTINUE

The project team is currently capturing all the comments and analysing the feedback received. We will get back to you once the analysis has been completed.

Your comments and feedback will be incorporated into the final stage of the detailed design process. The team will return in a few weeks' time to present the final proposal to the community.

## BOAT BAY MAPPING TO IMPROVE SAFETY

A specialist diving company has recently mapped several rock hazards in the vicinity of the boat ramp to determine if they can be relocated. The divers also surveyed the area around the jetty for rock outcrops and measured the depth of the water at the end of the jetty.

## PERRY HARVEY JETTY DEPTH

Within the accuracy of the survey method, the depth of water at the Perry Harvey is similar to the depth of water at the old Clump Point jetty. There is approximately 2.07 metres of water at the end of the new jetty at the lowest astronomical tide (LAT), which differs by only 50mm (2 inches) from the water depth at the end of the old Clump Point jetty (i.e. 2.12 metres at LAT).

## SURVEYS STILL WELCOME

If you have not taken the opportunity to have your say we will be accepting surveys until the end of February.

If you have any questions please contact the project team during business hours on:
